CURRICULUM VITAE

Narendra N. Das

Research Scientist
Water and Carbon Cycles Group
Jet Propulsion Lab, NASA
California Institute of Technology
4800 Oak Grove Drive
Pasadena, CA- 91109
Office Ph: (818) 354-5506, Cell Ph: (979) 422-5908
E-mail: Narendra.N.Das@jpl.nasa.gov

Education:

Aug 2008	Ph.D., Biological and Agricultural Engineering (Focus: Hydrology and Remote Sensing), Current GPA: 4/4 Texas A&M University, College Station, TX
2005	M.S., Biological and Agricultural Engineering (Focus: Hydrology and Remote Sensing), GPA: 3.8/4 Texas A&M University, College Station, TX
1994	Bachelor of Chemical Engineering, GPA: 3.97/4 National Institute of Technology, Raipur, India (Formerly Govt. Engineering College, Raipur)

Research Experience

Currently involved in the Soil Moisture Active Passive (SMAP) mission of NASA. Conducting research to combined radiometer and high-resolution radar data to develop SMAP-based ~10 km global soil moisture product for scientific advances and societal benefits. Member of SMAP Algorithm Development Team. Initiating partnerships and collaborations with user communities to develop applications for SMAP products.
Conducting research to understand the scaling properties of soil moisture with varying vegetation, topography and soil properties. Applying remotely sensed geophysical variables in hydrologic models to better understand the large scale processes in hydrologic cycle.

Dissertation: Modeling and application of soil moisture at varying spatial scales with parameter scaling
Advisor: Dr. Binayak P. Mohanty

- Adopting state-of-art techniques to study evolution of soil moisture at varying scales.
- Developing 3D-models for vadose zone hydrology and integrating it with microwave remote sensing.
- Characterization and scaling of soil hydraulic properties at varying scale i.e., field- to regional-scale.
- Characterization and study of uncertainty in backscattering coefficients of active (radar) microwave remote sensing of soil moisture.

Thesis: Soil Moisture Modeling and Scaling Using Passive Microwave Remote Sensing

Advisor: Dr. Binayak P. Mohanty

- Developed a root zone soil moisture assessment tool (SMAT) in the ArcGIS platform by fully integrating a one-dimensional vadose zone hydrology model (HYDRUS-ET) with an ensemble Kalman filter (EnKF) having data assimilation capability for remotely sensed data.
- Investigated the scaling properties of soil moisture using airborne passive microwave remote sensing i.e., Polarimetric Scanning Radiometer data from a region having high row crop agriculture.
- The master's research resulted in three peer reviewed publications, and I also presented my research work in national conferences.

Teaching Experience

Graduate Teaching Assistant, 2005 − Present
Biological and Agricultural Engineering Department, Texas A&M University

- Taught graduate level course: Application of Microwave Remote Sensing of Soil Moisture
- Taught labs for graduate level Vadose-zone Hydrology and held review sessions
- Assisted with graduate course for 10 students; held office hours, worked with student projects

Professional Experience:

Postdoc, Water and Carbon Cycle Group, (March 2009 – present)
Jet Propulsion Lab (NASA), California Institute of Technology, California

Postdoc, Joint Institute for Regional Earth System Science and Engineering (JIFRESSE), (Aug 2008 – Feb 2009), UCLA, California

Graduate Internship, Summer 2007
Water and Carbon Cycle Group, Jet Propulsion Lab
California Institute of Technology, California

- Learned active/passive microwave remote sensing techniques of soil moisture
- Motivated me to conduct research to bridge the existing knowledge gaps in vadose zone hydrology and microwave remote sensing

Graduate Research Assistant, 2003 – 2008
Biological & Agricultural Engineering Dept., Texas A&M University

- Conducted hydrological studies at watershed- and regional-scale using extensive remotely sensed datasets.
- Developed algorithm and tool for assessment and assimilation of hydrologic state variables.

Manager (EDP&IT), 1999 – 2002
Bhilai Steel Plant, Steel Authority of India Limited

- Managing projects for in-house IT solutions
- Developed turnkey software projects
- Supervised maintenance of software
- Upgraded and customized software to user satisfaction

Assistant Manager (EDP&IT), 1995 – 1998
Bhilai Steel Plant, Steel Authority of India Limited

- Developed IT teams
- Monitored progress of software development to meet deadlines
- Intensively involved in software development
- Organizing training courses for skill and knowledge enhancement

Grants Awarded:

- 2007-08 USGS Research Grant Recipient
  Awarded each year to a few students to conduct water related research.

Projects:

- Physical controls of soil moisture and vadose zone fluxes across space-time scales under different hydro-climatic conditions, *NASA-THP*.
- A fine-scale soil water balance modeling for AMSR-E soil moisture calibration and validation, *NASA-JPL*.
- Multiscale data assimilation of soil moisture under heterogeneous soil hydraulics, *NSF-CMG*.
- Satellite remote sensing of soil moisture—Evolution of statistics with scale, *NASA-THP*.
- A fine-scale soil water balance modeling for AMSR-E soil moisture calibration and validation, *NASA-JPL*.

Field Experience:

- Participated in Soil Moisture Active Passive Validation Experiment 2008 (SMAPVEX08), Maryland. Conducted by USDA and NASA.
  Exposure to logistics of scientific field campaign required for SMAP mission of NASA.

- Participated in Soil Moisture Experiment 2005 (SMEX05), Iowa. Conducted by USDA and NASA.
  Received extensive insight of field measurement and site selection in an agricultural landscape. Exposure to logistics of scientific campaign.

- Participated in Soil Moisture Experiment 2004 (SMEX04), Arizona. Conducted by USDA and NASA.
  Received extensive insight of field measurement and site selection in a semiarid environment. Exposure to logistics of scientific campaign.

- Participated in site experiment at Honey Creek 2004, to study juniper tree infiltration characteristics at the Edwards plateau. Conducted by Biological and Agricultural Engineering Department, Texas A&M University, College Station, Texas.
  Acquired experience and insight of karst hydrology.

- **Das, N. N.**, B. P. Mohanty, and Y. Efendiev, December 2008. A new Multi-Scale Data Assimilation Algorithm to Downscale Satellite-Based Soil Moisture Data. *American Geophysical Union* (*AGU*) *Fall Meeting*, San Francisco, California.

- **Das, N. N.**, E. Njoku and D. Entekhabi, September 2009. Development of global high resolution soil moisture product from the SMAP mission. *Postdoc Poster Research Day*, JPL, CalTech.

- **Das, N. N.**, S. Chan, E. Njoku and Li Li, March 2010. Long Time Series Observations Over Land from AMSR-E and WindSat. *Microrad Conference*, Washington DC.

Professional Service and Affiliations:

- American Geophysical Union
- Soil Sciences Society of America

Honors and Awards:

- Outstanding Student Paper Award for presentation at the 2008 Fall Meeting in San Francisco.

- Recipient of 'Association of Former Students ***Distinguished Graduate Student Research Award***' in the Texas A&M University 2005
Awarded each year to a master students at university level for excellence in research

- Recipient of 'Bill, A. and Rita L. Stout, ***International Graduate Student Achievement Award***' in the Biological and Agricultural Engineering Department, Texas A&M University, 2004
Awarded each year to an international students for outstanding performance

- Recipient of '***Nehru Award for Excellence* in *Productivity***' EDP&IT, Bhilai Steel Plant, Steel Authority of India Ltd, 2001
Awarded each year to a few employee for excellence in productivity

- Secured Merit position in the class of 1994 Chemical Engineering, National Institute of Technology, Raipur, India

Graduate Certification in GIS:

- ESRI ArcGIS 9.0, ArcObjects, ArcINFO, and ArcIMS
- ArcGIS Modeling Extensions: 3D analyst, Spatial analyst, Feature analyst, Geostatistical analyst, and Hydrology extension
- Satellite image processing; microwave, multi-spectral, hyper-spectral, and RADAR images

Modeling Tools & Skills:

- Kalman Filter, Ensemble Kaman Filter, Neural Network, Fourier Analysis and Wavelet Analysis
- Modeling Packages: HYDRUS (1D & 2D), SWAP, Noah, VIC
- Using aforementioned tools and model in GIS coupled environment for watershed and regional scale hydrology

Computer & Modeling Skills:

- Proficient programmer in Java, Visual basic, Fortran, Matlab, Oracle-PL/SQL, C

Community and Student Activities:

- BAEN Graduate Student Representative, Graduate Student Council, Texas A&M University, 2007 - present
- Vice President Finance of University Apartment Community Council, Texas A&M University, 2006 - 2007
- Vice President Programs of University Apartment Community Council, Texas A&M University, 2005 – 2006
